

HARDWARE WORKBOOK
SPRING / SUMMER 2024

WE EXIST TO CONNECT PEOPLE WITH NATURE

Halti is for active people who value the outdoors, who seek moments where they can connect with nature. Our brand appeals to those who appreciate natural calmness, perfect functionality and minimalism – from busy urbanites spending a few hours outdoors to the world’s top professional athletes. We exist to help everyone find their own way to enjoy outdoor activities.

Halti wants to preserve beautiful nature for future generations. That is why we continuously improve our processes and strive to design products that are timeless, long-lasting and made from recycled materials. Our sustainable development program is called “Think Ahead”. In short, we are Bluesign® system partner and we demand that both our new and existing subcontractors comply with the detailed bluesign® restricted substance list. All our factories are Amfori BSCI audited, which ensures fair working conditions and safeguards the rights of our subcontractors’ workers. In addition, we put a lot of efforts into increasing the use of sustainable materials and material dyeing methods. State-of-the-art 3D software helps us also to significantly reduce the amount of textile waste, emissions from logistics and packaging. Our goal is to be carbon neutral in our own operations in Finland headquarters in 2022. We know that we still have much work ahead of us, but with small steps we will do our part to ensure that future generations will also be able to enjoy the nature.

We are inspired by Nordic nature, from the simple use of raw materials to the colors and patterns that we experience in our natural surroundings. Our cultural values of simplicity and balance are an essential part of our desire to create harmony in function, ease of use and durability that culminates in timeless design. Our products are worn, tested and developed together with the world’s leading athletes and outdoor professionals. In addition, our talented in-house designers, who know the customers from occasional nature lovers to top athletes, constantly monitor, identify and integrate emerging style and color trends to design new products and refresh successful lines.

In the SS23 collection we are extending our functional, stylish and sustainable outdoor hardware by launching a line especially designed for women, to provide better fit and more comfort. Another highlight for the season includes an extension of the lightest “Kevein”- series with ultralight items, so you’ll have maximum comfort and lightness for every adventurous pursuit.

Breathe the outdoors and enjoy.

CEO, Aki Kuusilehto

Halti kestävän kehityksen ohjelma

Puhdas luonto on ollut meidän sukupolvellemme itsestäänselvyys. Me Haltilla katsomme tulevaisuuteen ja teemme voitavamme, jotta jälkipolvetkin saisivat nauttia siitä. Kaikki Haltin toiminta perustuu sekä ympäristön että ihmisen kunnioittamiseen, sillä tuotteemme on suunniteltu luonnossa liikkumiseen ja urheiluun. Think Ahead -kestävän kehityksen ohjelmamme myötä otamme vastuun sosiaalisesta, ympäristöllisestä ja taloudellisesta jalanjäljestämme. Työtä on vielä paljon, mutta pyrimme toiminnassamme jatkuvasti parempaan – tuotteen elinkaaren jokaisessa vaiheessa. We think ahead!

Ympäristövastuu

- Suunnittelemme ja valmistamme käyttöä sekä aikaa kestäviä tuotteita huomioiden ympäristövaikutukset tuotteen koko elinkaaressa.
- Olemme bluesign® system partner ja vaadimme uusia ja nykyisiä bluesign®-alihankkijoitamme noudattamaan erittäin tarkkaa rajoitettujen ainesosien listaa. Lue lisää www.bluesign.com.
- Kaikki vaatteemme, kenkämme ja retkeilyvarusteemme ovat 100% PFC-vapaita.
- Tuotteemme tehdään ihmisiä ja ympäristöä kemikaaleilta suojaavien REACH-asetusten mukaisesti.
- Emme käytä tuotteissamme aitoja eläinten turkiksia.
- Tiukkojen RDS-standardien ansiosta tuotteemme on valmistettu korkealaatuisesta ja eettisesti tuotetusta untuvasta.
- Emme hyväksy eläinten epäeettistä kohtelua kuten pakkosyöttämistä, elävien lintujen höyhennystä tai mulesing-menetelmällä tuotettua villaa.
- Käytämme suunnitteluprosessia optimoivaa 3D-mallinnusta.
- Pääkonttorimme noudattaa ympäristöjärjestelmää, jolle WWF Suomi on myöntänyt Green Office-merkin 25.1.2022.
- Pääkonttorimme energianlähde on 100% uusiutuvaa vesienergiaa.

Yhteiskunnallinen ja sosiaalinen vastuu

- Tuotteemme valmistetaan sosiaalisesti ja eettisesti hyväksyttävissä olosuhteissa.
- Olemme amfori BSCI-jäseniä (vuodesta 2010), jonka avulla takaamme reilut työolosuhteet ja huolehdimme alihankkijoidemme työntekijöiden oikeuksista. 100% vaate- ja kenkätehtaistamme ovat BSCI-auditoituja.
- FIBS - yritysvastuuverkoston jäsenenä osallistumme aktiivisesti yhteiskunnalliseen vaikuttamiseen taloudellisesti, sosiaalisesti ja ekologisesti vastuullisen toiminnan edistämiseksi.
- EOG-organisaation jäsenenä osallistumme toimialamme kestävän kehityksen hankkeisiin ja saamme ensikäden tietoa toimialaamme koskevista asioista.

Tavoitteemme tulevaisuudessa

Kestävä kehitys on ollut tärkeä osa Haltin yritysstrategiaa jo vuodesta 2010. Olemme aikaansaaneet paljon, ja jatkamme toiminnan kehittämistä. Myös tulevaisuudessa tavoitteemme ovat korkealla. Pyrimme seuraaviin konkreettisiin tavoitteisiin:

- Olemme Suomen pääkonttorin toimintojen osalta hiilineutraali vuonna 2022.
- Lisäämme merkittävästi kierrätettyjen materiaalien käyttöä tuotteissamme.
- Käytämme pakkausmuoveissamme vain 100% kierrätettyä muovia.
- Kehitämme yritys vastuuta monipuolisesti FIBS:n ja EOG:n jäsenenä.
- Olemme bluesign® system partner ja vaadimme uusia ja nykyisiä bluesign®-alihankkijoitamme noudattamaan bluesignin erittäin tarkkoja vaatimuksia.

ECO TUOTTEEN ON TÄYTETTÄVÄ VÄHINTÄÄN YKSI SEURAAVISTA VAATIMUKSISTA:

Käytetty materiaali on bluesign® rajoitusten mukainen ●● Se on valmistettu kierrätetystä materiaalista ●●
Vettähylykivyyksäsittely on täysin fluorihilivapaa ●● Se on valmistettu orgaanisesta puuvillasta ●●
Tuotteessa käytetty korkealuokkaista untuvaa joka on elintarviketeollisuuden sivutuote ja jäljitettävissä

Halti's sustainable development programme

Our generation has always taken our clean nature as a given. We at Halti have set our sights far into the future and we are doing all we can so that later generations can enjoy it like we have. All of Halti's operations are based on respecting the environment and other people. After all, our products are designed for outdoor life and sports. With Think Ahead, our sustainable development programme, we take responsibility for our social, environmental and financial footprints. We have much work ahead of us, but we are continuously trying to do better—in every phase of the product lifecycle. We think ahead!

Environmental responsibility

- We design and manufacture durable and timeless products with the design philosophy of considering the environmental effects of the whole product life cycle.
- We are a bluesign® system partner and demand that both our new and existing bluesign® subcontractors comply with the detailed bluesign® restricted substance list.
- Our products are made in compliance with the REACH regulations, which protect people and the environment from harmful chemicals.
- We do not use real fur in our products.
- We follow the RDS standard, which means that our products are not made with feathers that are plucked from living birds.
- We do not accept the unethical treatment of animals such as forced feeding, the plucking of living birds, or mulesing method in wool production.
- We use 3D design program, which optimizes the design process.
- Our Head Office follows WWF Green Office environmental management system to which WWF Finland has awarded the Green Office label on 25.1.2022.
- Our headquarters use 100% renewable water energy.

Corporate social responsibility

- Our products are made in socially and ethically acceptable conditions.
- Since 2010, our procurement operations have been guided by our membership of the Business Social Compliance Initiative (amfori BSCI), which guarantees fair working conditions and safeguards the rights of our subcontractors' workers. 100% of our clothing and shoe factories are BSCI-audited.
- As a member of amfori BSCI, we actively exert our influence to promote economically, socially and ecologically responsible operations and maintain our awareness of these issues.
- As a member of the EOG, we take part in sustainable development projects in our industry and obtain first-hand information about matters relevant to our sector.

Our future aim

Since 2010, sustainable development has been an important element of Halti's business strategy. A lot has been done already, but we are continuously improving our activities and will continue to aim high. These are our concrete targets in the near future:

- We will be a carbon neutral company by our own operations in 2022.
- We are significantly increasing the use of recycled materials in our products.
- We will use 100% recycled plastic as packaging materials.
- We are improving our corporate responsibility in diverse ways as a member of EOG.
- As a bluesign® system partner we demand our new and existing bluesign® subcontractors to comply with the bluesign®'s detailed list of restricted substances.

ECO PRODUCT FEATURES MINIMUM
ONE OF THESE QUALITIES:

Product received the ECO label when; Fabric used is certified bluesign® approved ●●

It is produced of recycled material ●● The WR treatment is fluorocarbons free ●● It is made of organic cotton ●●
It is made of high-quality down from strictly controlled suppliers, where the down is a by-product of food production

BAGS & PACKS

Halti was born from one man's ambition to outfit all people with the gear needed to explore and connect with the outdoors more easily. In the SS23 collection we are extending our commitment to functional, stylish and sustainable outdoor bags and packs for all by launching a backpack line for women designed to provide better fit and more comfort for women's shape. These packs in delicious colors are body mapped for women featuring shorter back panel, belt and curved and contoured straps. Another highlight for the season includes an extension of the lightest "Kevein"- series with an ultralight all year-round weekend backpack with a supportive and highly ventilating frame solution, so you'll have maximum comfort for every adventurous pursuit.

SLEEPING BAGS

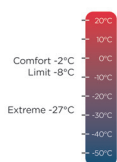

Customized comfort and warmth with a little bit of luxury is key to an awesome sleep outdoors. And as women are more likely to freeze than men, the SS23 collection includes a new product line especially targeting women keeping insulation density, preferences and shape in mind. With added insulation at the torso area and foot end and the optionable Wedge section to get a looser sleeping bag, our women's sleeping bags differ from our regular size sleeping bags. Another highlight for the season is the ultralight and sustainable sleeping bags in the lightest "Kevein"- series made with animal-friendly RDS certified duck down and bluesign® certified materials. In short, sustainability without compromising neither performance nor comfort.

SLEEPING PADS

Committed to providing warmth and comfort when sleeping on the ground and light enough to carry anywhere. In addition, the new insulated sleeping pads in Microfiber Polyester are suitable for year-round use. The super-comfortable seating pad has also found its place in the new SS23 collection. And the sleeping pads in the lightest “Kevein”- series are designed to be of sufficient size, but at the same time very lightweight. Overall, the Halti sleeping pads are made from light yet durable fabrics, while minimizing heat loss and their small pack sizes make them ideal for trips and adventures.

046-0607 **XPD ULTRALITE 2 TENT** Hiking, Trekking

XPD Ultralite is a tent for three seasons. This ideal three/two-person camping tent is designed to be at the same time both strong and lightweight. This tent is a great companion for camping from spring to fall. This tent has a wind-resistant design, wedge-like shape cuts through the wind. In addition, unnecessary space is kept to a minimum, reducing weight and package volume. Silicone-treated ripstop fabric is very lightweight and reduces weight. Fabric's silicon coating strengthens fabric substantially. Silicone treatment also improves the fabric's UV resistance. Lightness is the starting point; every detail has been designed to minimize total weight, without compromising durability and practicality. This tent comes with a repair set including fabric patches, pole bushing, and extra pole hook.

DETAILS:

Three season tent / Ultra-light / Mosquito tight / Seam taped / Wind-resistant tunnel design / Fabric's silicone coating / Silicone treatment improve the fabric's UV resistance / Repair set including fabric patches, pole bushing, extra pole hook / DrymaxXÆ Shield fabric

OUTER TENT:

ACCESSORIES & SPARE PARTS

Halti accessories and spare parts are small but important and complement the camping gear. Accessories and spare parts extend the lifetime of both backpacks and tents by repairing and replacing worn and broken parts. Also, in case you happen to lose your tent arch or rain cover, it is easily replaceable with the new part. We warmly recommend this way of ecological thinking and acting as you can keep your old and familiar product longer.

MATERIALS

FOR BACKPACKS & TENTS

BACKPACK FABRICS

Recycled Polyester

Fabric made from recycled PET bottles. Comfortable and flexible waterproof fabric used in back packs and bags intended for daily use. Triple PU coating for excellent waterproofness.

Ripstop Polyester or Polyamide

Strengthened Polyester or Polyamide fabric, made with a special weaving technique. Triple-treated Polyurethane (PU) to make it waterproof. The fabric's outer surface is also treated to make it dirt- and moisture-repellent.

Two-tone Ripstop Polyester

This Polyamide fabric is woven with two different shade. Fabric is coated with PU on reversed side and water repellent treatment on the top side.

Tarpaulin

Strong and water proof material. Tarpaulin material can also be welded by the seams.

Ripstop Polyester

Fabric with Ripstop structure as reinforcement. Suitable for light products.

Velveton

Soft, non-rustling fabric for hunting backpacks. Waterproof membrane is on the reverse side of the fabric.

1050D High Density Polyester

Fabric made from recycled PET bottles. Super strong Polyester fabric, made with an extremely strong yarn. Triple-treated Polyurethane (PU) to make it waterproof. The fabric's outer surface is PU coated to make it dirt- and moisture-repellent.

Reflective Polyester

Polyester fabric with reflective lamination on top.

Polyester mélange

Stylish Polyester fabric used in packs and bags for daily use. Three times PU coating makes the fabric water repellent.

Lite rip stop Polyamide

Super lightweight Nylon fabric with rip stop reinforcement. PU coating makes the fabric waterproof. TPU laminated fabric. The fabric is laminated with a environment friendly TPU material. TPU makes the fabric totally waterproof.

TENT FABRICS

All our tents have a DrymaxX Shield classification. That means the flysheets and the ground fabrics are waterproof.

OUTER TENTS

Silikon Nylon R/S

Silicone treatment makes the fabric tougher and more resistant to tearing. Slush and snow does not easily stick to this fabric. Ripstop structure strenghtens the fabric.

15D Silicone Nylon R/S

PFC free, 15D Ripstop Polyamide fabric with 5000mm PU coating on inside and silicone-treated on outside. Waterproof seam tape.

Polyester Ripstop

Quality outer tent material, coated with PU to make it waterproof. This material has also taped seams thereby improving the waterproofing further. Ripstop structure strenghtens the fabric and improves the tear-resistance.

Silver coated Polyester

Basic fabric is a normal Polyester, but silver colour has been added to the PU. The silvering improves heat reflectance away from the tent fabric. This property is especially good in lean-tos and rescue blankets.

Polyester PU

Quality outer tent material, coated with PU to make it waterproof. This material has also taped seams thereby improving the waterproofing further.

INNER TENTS

Oxford Polyamid

Material is used especially in groundsheets and storage bags do to its excellent durability to wear and puncture resistance. This fabric is also coated to make it waterproof.

40D Ripstop Polyamid

Water-repellent but superlite fabric that ventilates a tent well.

Breathable Ripstop Polyamid

Used in innertents. Water-repellent fabric that ventilates a tent well.

Ripstop structure strenghtens the fabric and improves the tear-resistance.

Breathable Polyester; Used in innertents. Water-repellent fabric that ventilates a tent well.

Laminated PE; Used in inner tent floors. Strong and waterproof, but not seam taped.

MATERIALS

FOR SLEEPING BAGS & MATTRESSES

SLEEPING BAG FABRICS

Recycled Bluesign certified 30D Polyester

This super light Polyester fabric is made according to Bluesign regulations, using non-toxic chemicals. Recycled fabric made out of used PET bottles.

Recycled 20D Mini Ripstop Polyamide

Recycled fabric made out of used PET bottles. Heat printed shell material with water repellent treatment.

20D Ripstop Polyamide

Superlight sleeping bag fabric, Polyamide fabric is made of microscopically fine filaments exploiting the latest technology.

Soft Touch Polyester

This fabric, treated by a special method, has a soft, fluffy surface that disperses and evaporates moisture and is comfortable against the skin.

Heat printed Polyester

This fabric is printed by heat, without any added chemicals or color dyeing.

MATTRESS MATERIALS

Recycled Polyester is made out of recycled PET bottles.

TPU stands for Thermoplastic Polyurethane. Laminated on fabrics for mattresses to make the mat airtight.

“D” stands for Denier and indicates the thickness of the fabric, e.g. 20D that is extremely lightweight and thin fabric.

Ripstop is a structure waved into the material making a thin fabric stronger.

SLEEPING BAG INSULATIONS

All down used by Halti is RDS and Bluesign certificated. Down is collected from birds that are already dead. Down or feathers are not plucked from living birds.

Down

A natural product recovered from poultry produced for food.

Fill power

The fill power value is expressed in the insulation and the high quality of the down.

Down 90/10 or 80/20

Down in ratio 90/10 or 80/20. Down 90/80% and small feathers 10/20%, giving the filling more springiness and lightness.

Microtherm

New-age technology product. Developed in cooperation with one of the world's leading fiber manufacturers. This insulation functions flawlessly also in the harsh and variable weather conditions of the North.

Quattrofill 7

Seven-holes fiber, which stores heat within it and insulates efficiently against cold.

100% Natural sheep wool

EN-13537 temperature standard

Halti has adopted the EN standard to specify the temperature rating of sleeping bags. The EN-13537 standard specifies the lowest temperatures for sleeping bags in the categories Comfort, Limit and Extreme.

The Comfort rating indicates on the lowest temperature at which an average woman is just not feeling cold in the sleeping bag.

The limit rating indicates the lowest temperature at which a man is just not feeling cold in the sleeping bag.

The Extreme temperature is the temperature where the risk of health damage by hypothermia occurs.

BACKPACK

ADJUSTMENTS

ADJUSTING A BACKPACK

- Loosen the shoulder and hip belt straps to place the pack on your back.
- Set the hip belt always in the same location, above crest of the hip (iliac bone).
- Tighten the hip belt and shoulder straps.
- With the hip belt in place, the shoulder straps should contour the line of the shoulders closely to ensure the weight of the backpack is distributed evenly.
- If the shoulder straps move too low or an empty space remains between the shoulders and the straps, the length of the back section of the pack should be adjusted.
- The back section of every pack is adjustable according to the height of the carrier, ensuring that the correct carrying position achieved for nearly everyone.
- Fine adjustment of the backpack can be made only when it is fully loaded, at which time it is possible to see how well the pack fits the carrier.
- Because the hip belt carries most of the load, the design and structure of the belt is extremely important. The transfer of weight as near as possible to the carrier's central point, as well as keeping the load balanced, facilitates movement and saves energy.

PACKING A BACKPACK

- When packing a backpack it is a good idea to keep the centre of gravity as close as possible to the back and heavy items at the level of the upper back. This ensures that the backpack is more balanced for carrying.
- Avoid packing items outside the pack, because this easily changes the centre of gravity and makes the rain cover, for example, difficult to attach. External items can easily snag on branches etc.
- Over difficult, varied terrain it is good if most of the weight is at the hip belt, and the centre of gravity is therefore lower (60/40%).
- In more uniform, gentle terrain the pack's centre of gravity can be raised closer to the upper back and shared equally (50/50%) between the hip belt and the shoulder straps.
- On a steep ascent, it is worth pulling the adjustment straps closer to the back to facilitate climbing.
- Most backpacks have an 'over packing' option, which allows the addition of 10 litres more gear. A tent or sleeping mat can also be conveniently fitted under the lifting flap.
- Halti Green backpacks have bellows pockets, which can be flattened against the side of the pack. This ensures that side pockets are not in the way during skiing, for example.

PETITE

Designed especially for women to provide better fit, more comfort and more warmth.

SLEEPING BAG

MAINTENANCE

SELECTING A SLEEPING BAG

Purpose

A cold, damp autumn night in Lapland (-6°C at night) or a warm summer's night further south set different requirements for the structure of a sleeping bag. A sleeping bag has no warming battery; its task is to insulate the heat generated by the sleeper as efficiently as possible. That's why lightweight materials that insulate well are also more expensive.

Down or fibre filling?

For its weight, down is still more insulating than even the finest artificial fibres, but when it gets wet it does not dry as quickly as fibre bags, and thus loses some of its insulating properties. A down filled sleeping bag is lighter than a corresponding fibre sleeping bag with the same thermal rating.

Right size

The cooler the conditions in which you sleep, the more important it is that your sleeping bag is the right size. Autumn and winter bags have more insulation, thermal collars that prevent heat loss, thermal flaps on zips and well-designed hoods. If children sleep in an adult bag, a good tip is to tie off the excess bag at the foot end with string, for example.

A sleeping mat to suit the conditions

In cooler conditions, the importance of a sleeping mat is greater, as it insulates the cold coming from the ground. During sleep, the sleeping bag flattens under the sleeper and the bag's insulating material is unable on its own to maintain warmth without a good, insulating mat. There are air-filled mats, ranging from light summer mats all the way to robust winter mats, some that even incorporate a pillow.

Don't go to your sleeping bag cold or hungry

A short walk or exercise session before going to your sleeping bag will accelerate your body's heat production, and heating the sleeping bag won't take so long. Moreover, enjoying some food before you go to sleep will also accelerate the heating of the bag.

HOW TO TAKE CARE OF YOUR HALTI SLEEPING BAG

- Air and dry the sleeping bag thoroughly after use.
- Avoid storing your sleeping bag for long periods in its stuff sack as this may weaken its thermal insulation properties.
- The best way to store your sleeping bag is to hang it upside down from the loop at the end or loosely rolled up.
- Sleeping bags can be washed by hand or in a large washing machine (max. 40°C).
